

Do you want to influence the sustainable development of UU's physical milieu?

Welcome to a workshop about the UU development plan 2050

In this workshop we will work together in order to give input to the sustainability aspects of Uppsala University's development plan. The output from the Workshop will be treated as a submission for comment (sv: remiss-svar) by the development plan's project team.

The development plan paint a vision of the Uppsala and Gotland campus in 2050 and revolves around the development of the physical milieu of our University. The plan is described as follows: "Development Plan 2050 is of a strategic nature and was initiated by the vice chancellor of Uppsala University to draw up a comprehensive plan for the university's spatial structure and physical design during the coming decades". The development plan directive give proposals in five areas and one of these is "ecological, economic and social sustainability."

When: 18th of February 2020
Where: The CEMUS Library, (Villavagen 16, Earth Sciences Dept.)
Time: 10.00 (sharp) - 12.00
Registration: <https://forms.gle/5Y2xd6sooXreS3qD9>

Who can attend?:

Staff, students and others who are interested in sustainability and the future of Uppsala University.

Workshop set up

Before the workshop (if you have time):

Take **10 min** or more to think about one of the areas below. If you have time, read through the short section about them in the report. What do you think that UU should be focusing on in this area?

1. Renovation of current buildings preferred over new ones,
2. Climate adaptation,
3. Energy solutions,
4. Infrastructure and transport,
5. Higher facility utilisation and shared resources,
6. Climate impact and negative emissions,
7. Ecosystem services,
8. Social sustainability
9. A virtual campus
10. Other area you believe is important

During the workshop: After a short introduction, 20 min is spent in small groups organised according to area of interest. I.e. people who are for instance interested in 'Climate adaptation' will be in one group, people interested in 'Energy solutions' in one and so forth. During the discussion comments and suggestions are written down by one group member who is appointed secretary.

The remaining time is spent in the big group and we all discuss each subject. The secretary of each group complement the groups comments with insights from the larger group. In the end of the workshop these comments are sent to the workshop organisers in order for them to put together the final input that will be sent to the project team working with the development plan.
